

Sound Design & Music Production Masters in Europe — Deep Sweep

253 programmes found across every European country, searched in English *and* the local language (Sounddesign, conception sonore, reżyseria dźwięku, zvuková skladba, musica elettronica, producao musical ...), covering public universities, conservatories, art schools, **film schools**, and private academies.

Ranked for **you** specifically: a Tunisian software-engineering graduate, no music degree, no performance training, portfolio still to build, funding strongly preferred, Sept-2027 intake.

Scoring: funding (40) + accepts a non-music degree (30) + no live audition (15) + production focus (10) + language you have (10).

Verification status — read this. Every entry below was written from official programme pages during discovery, and most quote them verbatim. A separate second-pass re-verification finished for Germany but was cut short by usage limits elsewhere, so entries are marked *discovery-quality* unless stated.

Confirm on the source URL before applying.

THE HEADLINE FINDS

1. Politecnico di Milano — MSc Music and Acoustic Engineering (*Music Engineering track*)

Milan · English · 2 years / 120 CFU · ~€4,000/yr · merit scholarships (auto-considered)

The single easiest admission on this entire list — and it's cheap. - No portfolio. No audition.

Admission is on transcript + English certificate alone. Given that the portfolio is your main gate everywhere else, this matters enormously. - It doesn't merely *accept* a CS degree — it **prefers** one. Official wording targets "*graduates in Computer Science and Engineering*". - Studies: Advanced Coding Tools, Computer Music — Representations and Models, Multimedia Signal Processing, Sound

Analysis/Synthesis/Processing, Sound Design. - **Honest caveat:** this is *music engineering*, not producer craft. You'd leave able to build audio software and understand sound deeply — not necessarily with a finished EP. It's Path 1 wearing a Path 2 badge. Best treated as your **safety school with real funding upside**. - polimi.it/en/education/laurea-magistrale-programmes/programme-detail/music-a...

2. University of Glasgow — MSc Creative Sound Design & Audiovisual Media

Glasgow · English · 12 months · £26,460 — BUT full tuition waiver available

Probably the best risk-adjusted craft option in the UK for you. - African Excellence Award — a FULL TUITION FEE WAIVER, up to 16 awards, for international-fee students. Tunisia is African; confirm eligibility directly, this is the crux. - Entry list explicitly names "**electronics, computing or acoustics**" — your degree is inside the stated profile, not an exception to it. - Portfolio is small: **normally two or three pieces**. No audition. - Studies: Sound Shaping and Design · Creative Sound Recording · Audiovisual Composition · Creative Sound & Media Performance. Genuinely production- and performance-led. -

gla.ac.uk/postgraduate/taught/creative-sound-design-audiovisual-media/

3. Aalto University — MA Sound in New Media

Espoo/Helsinki · English · 2 years / 120 ECTS · €20,000/yr — Aalto Scholarship covers 50% or 100%

- **No music degree required, no instrument audition, no on-site test.** Only a "relevant Bachelor's".
- Selection is **portfolio + interview**, and the portfolio explicitly rewards a concept-and-technology approach — your coding is an asset, not a curiosity.
- Studies: concept design live performance storytelling programming. Art-school framing with real technical depth.
- **Best risk-adjusted Nordic option.** aalto.fi/study-options/masters-programme-in-new-media-sound-in-new-media

4. Aalborg University Copenhagen — MSc Medialogy, Sound & Music Computing

Copenhagen · English · 2 years · ~€15,500/yr — ~15 full scholarships/yr (waiver + stipend)

- Qualifying bachelors **explicitly include "Software"** — built for your exact background.
- **No portfolio, no audition.**
- ~15 AAU scholarships per year = full tuition waiver **plus** monthly stipend. Real odds, not a lottery.
- en.aau.dk/education/master/medialogy-cph

5. Leeds Conservatoire — MA Music Production

Leeds · English · 1 year · £20,600 · £5,000 Principal's Scholarships (×4 for internationals)

The most accessible genuinely production-focused master found. - Quoted verbatim: *"qualifications in other fields will also be reviewed and considered"*. - **IELTS only 6.0** — the lowest bar on this list, and you haven't sat the test yet. - Portfolio: **two projects, ~10 minutes** — studio production, sound design or electronic composition. - Modules: Creative Music Production · Postproduction Mixing and Mastering (**includes Dolby Atmos**) · Major Project. This is craft, not theory. -

leedsconservatoire.ac.uk/courses/postgraduate-courses/ma-music-production/

6. Goldsmiths, University of London — MMus Creative Practice (*Popular Music Composition & Production*)

London · English · 1 year · £22,000 — departmental full-fee-waiver scholarship exists

- Entry clause openly accommodates you: *"you might also be considered... if your degree is in an unrelated field, but have relevant experience"*.
- Portfolio: **four to six pieces** of recent original creative work. No audition.
- The most electronic-music-friendly MMus in London, in the best city in Europe for club music.
- gold.ac.uk/pg/mmus-creative-practice/

7. Trinity College Dublin — M.Phil. Music and Media Technologies

Dublin · English · 1 year / 90 ECTS

- Requires a 2.1 *"preferably, but not necessarily, in music, engineering or science"* — you're in the preferred set.
- Portfolio accepts *"musical/compositional/artistic and/or technological ability"* — **a coding project can be your portfolio piece.** Very few programmes say this out loud.

- Modules: Electroacoustic Composition · Sonic Arts · Creative Coding · Audio Engineering.
- Pair with the **Government of Ireland IES** scholarship (full tuition + €10,000).
- tcd.ie/courses/postgraduate/courses/music-and-media-technologies-mphil/

8. Berklee Valencia — MM Music Production, Technology & Innovation

Valencia · English · 1 year · ~\$50,430 + fees — scholarships exist but partial

- The strongest pure **producer/electronic-artist** curriculum found: hybrid analogue/digital recording, studio production, **electronic music production AND performance**, Max/MSP.
- *"Bachelor's degrees in other disciplines will be considered"*. **No audition** — instead a video describing three projects you're passionate about.
- **The blocker is money.** Even with a scholarship this is the most expensive option here by far.
- valencia.berklee.edu/graduate-programs/mpti/

FULLY FUNDED, BUT WITH A CATCH

Programme	Where	Funding	The catch
ReSound (Erasmus Mundus)	DublinLisbonVilnius	Full + €1,400/mo	Still your #1. Portfolio: 3 works, 10–15 min, one link. Online interview only, no live audition.
DIGICREA (Erasmus Mundus)	Saint-ÉtiennePortoKatowice	Full, zero tuition for everyone	Sound-Music entry track; 3–5 works. Wants exactly your art+science mix.
REPLAY (Erasmus Mundus)	LisbonGenkHelsinki	Full	Software engineering is a named target degree — easiest EMJM to be admitted to. But it teaches <i>game design</i> , not music.
UNATC Bucharest — Film Sound Art	Bucharest	Full (Romanian govt, incl. free language year)	Eligibility is purely credit-based — no field required . But taught in Romanian , and there's an on-site exam.
AGH Kraków — Acoustic Engineering	Kraków	Full via Banach (Tunisia explicitly eligible)	No portfolio/audition, engineering entry — but taught in Polish .
TU Berlin + Sonology double degree	Berlin The Hague	Low fees; DAAD possible	Intellectually the best CS-artist hybrid found — but requires German TDN 4 .
HAW Hamburg — Sound–Vision MA	Hamburg	No tuition for anyone	Names <i>"computer science, IT"</i> as welcome degrees, no audition — but German C1 .

AVOID — verified as blocked for you

- **Filmuniversität Babelsberg — Sound Design for Audiovisual Media** (*fully verified*). Europe's best film-sound school, and the 2027 window is genuinely published (12 Apr – 18 May 2027). But it requires a **B.F.A. in Sound or Tonmeister**, **DSH-1 German**, a reel of **at least three films you personally mixed**, and an on-site **Pro Tools scoring exam**. It also trains cinema sound supervisors, not producers. *Do not spend application effort here.*
 - **HfM Detmold — Musikregie/Tonmeister** (*verified*): a 1-year top-up **on an existing Tonmeister bachelor**. Not a conversion route.
 - Conservatoire performance masters generally — live auditions assume training you don't have.
-

What changed in my advice

Three things this sweep found that I'd have missed:

1. **Politecnico di Milano needs no portfolio at all**. Every other route makes the portfolio the gate. This one doesn't, it's cheap, and it explicitly wants CS graduates. It belongs on your list as a high-probability funded option even though the craft is more technical than you want.
2. **Glasgow's African Excellence Award** is a full tuition waiver with up to 16 slots, on a programme whose entry list names *computing*. That combination is rare.
3. **Leeds Conservatoire asks IELTS 6.0 and a 10-minute portfolio**, and puts "*other fields considered*" in writing. It's the lowest-friction real production master found.

What I'd actually apply to

- **Reach (fully funded, best craft)**: ReSound · DIGICREA
- **Target (accepts CS, fundable, real craft)**: Glasgow · Aalto Sound in New Media · Aalborg Medialogy
- **Access (lowest barrier)**: Leeds Conservatoire · Goldsmiths · Trinity College Dublin
- **Safety (no portfolio, funded, cheap)**: Politecnico di Milano

Same two gates as always: **IELTS by ~Sept 2026** (Leeds needs only 6.0) and **a portfolio of 3–5 pieces by Nov 2026** — which now covers ReSound (3 works/15 min), Glasgow (2–3 pieces), Leeds (2 projects/10 min) and Goldsmiths (4–6 pieces) all at once.
