

Spain — spring-intake master's programmes, enriched

Every programme here has a **confirmed cohort starting January–June**. For each one the sweep now records where in Spain it is taught, which university awards it, whether that institution is public or private, what it costs a non-EU student, and whether the qualification is recognised across Europe.

Every figure is traceable to the institution's own page or to the RUCT / BOE register; the per-programme sources are in the CSV and the workbook.

What the 76 programmes actually are

Recognition across Europe	Count	What it means
Recognised — official Máster Universitario, or the one Máster en Enseñanzas Artísticas	47	MECES 3 = EQF/EHEA level 7. Diploma Supplement as of right, doctoral access, treated as a second-cycle degree throughout the EHEA.
Not recognised — título propio / Máster de Formación Permanente and private-school certificates	28	The awarding body's own certificate. Not in MECES, not in the EHEA framework, no Diploma Supplement as of right, no doctoral access. Any recognition abroad is at the receiving university's or employer's discretion.
Not yet established	1	See that row's notes .

28 of 76 spring intakes — more than a third — carry no automatic European recognition at all. That is the most important line in this dataset. Many of the spring starts advertised in Spain are private certificates that will not on their own admit you to a PhD or count as a master's degree in another EU country, however the word *Máster* is used on the page.

Public or private

	Recognised	Not recognised
Public	23	0
Private	24	28

Every public-university spring intake found anywhere in Spain is at a single institution: **Universitat Politècnica de Catalunya, Universitat Politècnica de Catalunya**. No other Spanish public university runs a second cohort starting in the spring in these fields. The recognised masters at private universities are genuinely official degrees — but they are priced privately.

What it costs a non-EU student

32 of 76 publish a non-EU price; 44 publish none at all — most private schools quote only on enquiry. Where nothing is published the field reads NOT FOUND. No figure in this dataset is an estimate.

The twenty cheapest, all currencies euro:

Programme	Where	Sector	Recognised	Non-EU total
Experto en Inteligencia Artificial Aplicada a la M	Barcelona	private	no	€2,200

Programme	Where	Sector	Recognised	Non-EU total
Màster universitari en Aplicacions i Tecnologies p	Castelldefels	public	yes	€2,700
Master's degree in Advanced Telecommunication Tech	Barcelona AND Castelldefels	public	yes	€2,700
Advanced Mathematics and Mathematical Engineering	Barcelona	public	yes	€2,700
Master's degree in Aerospace Science and Technolog	Castelldefels	public	yes	€2,700
Master's degree in Applied Telecommunications and	Castelldefels	public	yes	€2,700
Master's degree in Engineering Physics	Barcelona	public	yes	€2,700
Master's degree in Natural Resources Engineering	Manresa	public	yes	€2,700
Master's degree in Optometry and Vision Sciences	Terrassa	public	yes	€2,700
Master's degree in Electronic Engineering (MEE)	Barcelona	public	yes	€4,050
Master's degree in Automatic Systems and Industria	Terrassa	public	yes	€4,050
Master's degree in Environmental Engineering	Barcelona AND Terrassa	public	yes	€4,050
Master's degree in Informatics Engineering	Barcelona	public	yes	€4,050
Master's degree in Mining Engineering	Manresa	public	yes	€4,050
Master's degree in Structural and Construction Eng	Barcelona	public	yes	€4,050
Master's degree in Technology and Engineering Mana	Terrassa	public	yes	€4,050
Master's degree in Management and Operation of Mar	Barcelona	public	yes	€4,050
Máster Universitario en Análisis Inteligente de Da	ONLINE	private	yes	€4,200
Máster Universitario en Ciberseguridad	ONLINE	private	yes	€4,200
Máster Universitario en Ciencia de Datos (Data Sci	ONLINE	private	yes	€4,330

The cheapest genuinely recognised route into Spain in the spring is UPC: a flat **45.00 €/credit** non-EU rate set by Catalonia's Decret 96/2026, so **€2,700 for a 60-credit master and €5,400 for a 120-credit one**. UPC's own FAQ still prints a stale 102.52 €/credit that contradicts both the tariff and every programme page; it is recorded as a conflict and used nowhere.

Where in Spain

Place	Programmes
ONLINE	32
Barcelona	14
Madrid	9
Terrassa	5
Castelldefels	4
Madrid, Sevilla or Valencia	3
Madrid AND Barcelona	2
Manresa	2
ONLINE for the February cohort	1
Madrid and Barcelona	1
Barcelona AND Castelldefels	1

Place	Programmes
Valencia	1
Barcelona AND Terrassa	1

33 of 76 are online, which is largely what makes a spring start feasible: a January or February cohort leaves only weeks between an admission letter and the first class, against a Tunisian student-visa process that runs one to three months. For the on-campus options that gap, not the fee, is the real obstacle.

Caveats that survive into the data

- **Academic recognition is not professional recognition.** An EHEA level-7 degree is recognised as a qualification; practising a regulated profession runs separately through Directive 2005/36/EC. UPC's *habilitant* engineering masters carry a **Spanish** professional entitlement, and that is the part that travels least well.
- **Language filters harder than cost.** Several official masters are verified Spanish-only from the ANECA memoria rather than presumed — UNIR's Ciberseguridad, Protocolo y Eventos and Composición Musical among them — and UPC's Industrial Engineering at Terrassa runs a Catalan morning group and a Spanish afternoon group with no English route at all.
- **A registry code is not a page.** Four UPC pages link an *a-extinguir* RUCT code instead of the live one, and UNIE redirects its official AI master's URL to a título propio. Live codes are recorded; superseded ones are logged beside them rather than dropped.
- **A 25-credit award is not a master's.** SAE's audio and music-production titles are 25 ECTS through UDIMA, against the 60–120 that RD 822/2021 art. 37.6 requires even of a *Máster de Formación Permanente*.
