How this was built

Parallel research agents ran in three waves — funding-first (Erasmus Mundus catalogue + government schemes), program-first by track, and a region sweep covering every European country — followed by a verification pass that re-checked each program's deadline, tuition, funding, and Tunisian eligibility against its **official** page. Aggregators were used only as leads. Nothing was invented; unconfirmed facts are marked **UNVERIFIED** / **Check** , and unpublished 2027 deadlines are labelled **PRIOR CYCLE – confirm new date** .

Timing reality: it's July 2026. Most Sept-2027 application windows open **Oct 2026–Feb 2027**, so many exact deadlines aren't published yet — the timeline tells you when each will appear. Your two immediate actions: **book IELTS (sit ~Sept 2026)** and **start your portfolio**.
