

Private universities & specialist schools — Spain · Portugal · Netherlands · Italy

Sound design, music production, audio engineering and music business. September 2027 intake.

114 private institutions and programmes examined, searched in English *and* in Spanish, Portuguese, Italian and Dutch. Discovery is complete in all four countries; the verification pass is still running — see *Status* at the bottom.

Read this first: the one test that decides everything

In all four countries a private school may legally sell you something called a "Master" that is **not a master's degree**. This is not a scam in the criminal sense — the schools are real, the teaching is often good — but the piece of paper is not what the word implies, and you will often be paying master's-level money for it.

Country	A real degree	What gets sold instead
Spain	Máster Universitario Oficial (ANECA-verified, listed in RUCT)	Título propio / Máster de Formación Permanente
Portugal	Mestrado (A3ES-accredited, DGES-registered)	Pós-graduação, curso técnico
Netherlands	NVAO-accredited MA/MSc	CRKBO "diploma", NRTO certificate
Italy	Laurea magistrale / Diploma Accademico di II livello	"Master" di I livello (60 CFU)

Only the left column gives you a degree valid across Europe and access to a PhD.

Correction — the visa test is *not* the same as the accreditation test

An earlier version of this document said an unofficial award usually blocks a student visa. The verification pass established that is **wrong for Spain**, and the real rule is more useful:

Spain's official management criteria for *estancia por estudios* (Ministerio de Inclusión, June 2025, under RD 1155/2024) state that **both títulos oficiales and títulos propios are admissible** for a study authorisation. What actually decides it is **study intensity**: the course must run **at least 91 days**, you must enrol in **at least 90% of the credits**, and it must carry **a minimum of 20 contact hours per week** — with a narrow exception for concentrated programmes only where **at least 12 of those hours are delivered in person**.

So the two tests are separate, and you must pass both:

Test	What it decides	What fails it
Accreditation	Whether it's a real degree — PhD access, recognition back home	Título propio, CRKBO diploma, "Master di I livello"
Contact hours / in-person	Whether you get the visa	Evening courses, part-time, hybrid, online

This is why a cheap *título propio* is not automatically ruled out — and why an evening timetable is fatal even at a legitimate university.

The single clearest trap found: *Pro Audio Education NL* awards a diploma titled "**Master Geluidstechniek / Media Productie**". It is not NVAO-accredited, carries no ECTS, and the school itself positions the training at *MBO+/HBO-* level — **below the bachelor you already hold**. €5,695. If you google "master muziekproductie Nederland", this will come up.

Netherlands — the answer is no, and it's structural

This is the most useful negative result in the whole sweep, so it's worth stating flatly:

There is no private NVAO-accredited master's degree in sound design or music production anywhere in the Netherlands. Not one. And no private Dutch audio school can sponsor your residence permit.

The Dutch market splits cleanly in two with nothing in between:

- **Accredited = public.** Every NVAO master in this field belongs to a government-funded institution — HKU Utrecht (Master of Music, Music Design), Conservatorium van Amsterdam (Master Immersive Audio). Those are outside this private-sector search.
- **Private = not accredited.** SAE, Abbey Road Institute, Sound Education, Pro Audio Education, DDMA, Master The Mix, AV Sound Education, DJ School Amsterdam — all CRKBO-registered at best. CRKBO is a *short vocational education register that grants VAT exemption*. It is not a degree accreditation.

The visa point is decisive. Only an IND *recognised sponsor* can apply for a Dutch student residence permit on your behalf. Not one private specialist audio provider in the country is on that register — and the two credible English-language schools say so themselves in writing.

And the prices are not small:

School	Programme	Price	What you actually get
Abbey Road Institute Amsterdam	Advanced Diploma, 1 yr full-time	€18,860– €20,160	Not a degree. No ECTS. No visa.
Abbey Road Institute Amsterdam	Advanced Diploma, 2 yr part-time	€20,580– €21,360	Same
SAE Amsterdam	BA (Hons) Audio Production, 24 mo	€25,630– €27,138	A UK <i>bachelor</i> — below your level
SAE Amsterdam	BA (Hons) Audio Production, 36 mo	up to €37,580	Same
SAE (online)	MA Professional Practice, Audio	£6,750	UK degree, fully online no visa
Pro Audio Education	"Master Geluidstechniek"	€5,695	Not a master. Dutch only.

Six of the nine private Dutch providers teach **in Dutch only** — ruled out before accreditation or visas even come up. Not one publishes any scholarship, bursary or fee waiver open to a non-EU applicant. Anywhere. The only "discounts" are paying upfront instead of monthly, and a Dutch income-tax deduction that is worth exactly **zero** to someone with no Dutch income — despite two schools advertising it prominently.

Verdict: do not build your September 2027 plan around a Dutch private school. The two things you need — an accredited master and a visa — are not purchasable from this sector at any price.

One thing worth stealing from the Netherlands: Abbey Road Institute publishes the most rigorous portfolio spec found anywhere in this sweep — **4 to 8 finished productions, MP3 or WAV, showing different roles (performer, producer, engineer, writer), with your specific role described per track.** That is an excellent target to build against for any application in any country. Adopt it now.

Portugal — three real degrees, and the best-value accredited route found so far

Portugal is where the private sector actually delivers. Three A3ES-accredited *mestrados* exist, all at recognised private universities, all visa-eligible, and all far cheaper than Spain or the Netherlands.

Universidade Católica Portuguesa, Porto — *Mestrado em Som e Imagem, Design de Som*

The strongest Portuguese option, with one hard caveat.

- **Degree:** genuine 120-ECTS *mestrado*, A3ES-accredited, valid for a PhD and a D4 visa
- **Tuition: €13,140 for the entire two-year degree** (€657 × 10 months × 2). No non-EU surcharge — you pay the same as a Portuguese student
- **Other fees:** €50 application, €460 enrolment. First year ≈ €7,080–€7,600
- **Entry:** the published eligibility list **names engenharia (engineering)** alongside cinema, audiovisual and design. This is the *only* programme in the Portuguese slice that names engineering in its own admission wording — you are on-profile, not an exception
- **Portfolio:** required for external graduates. No spec published — request the criteria from candidaturas.porto@ucp.pt
- **Deadlines (2026/27 pattern — confirm for 2027/28):** Phase 1 **2 Feb – 9 Apr**, interview 14–15 Apr, results 21 Apr. Phase 2 30 Apr – 11 Jun. Phase 3 1 Jul – 26 Aug. **Apply in Phase 1** — a Phase 3 result on 7 September leaves no time for a Tunisian D4 visa

The caveat: it is taught in Portuguese, and you don't speak it. An English route is unverified. This is the decision point. Your French makes Portuguese reachable — but reaching B2 by mid-2027 means starting now, not next spring.

Universidade Lusófona, Lisbon — *Mestrado em Produção e Tecnologias do Som*

Closest to what you actually want to do, cheapest accredited route in the sweep.

- **Degree:** 120-ECTS *mestrado*, A3ES "Acreditado", reg. R/A-Cr 34/2018/AL01
- **Tuition:** not published as one number — derived at ≈ **€7,600–€9,130 for the whole degree** depending on whether you pay in 10 or 12 instalments. Non-EU students pay **identical** tuition

- **First year ≈ €4,400–€5,400** plus Lisbon living (realistically €900–€1,300/month)
- **Content:** synthesis, sound design, studio practice, music computing, Max/MSP — and an **evening timetable**, so you can produce and gig during the day, in a live electronic-music city
- **Selection is published: 25% your previous degree, 75% interview + portfolio.** Any bachelor is formally admissible, but engineering is not in the named target audience — you will be judged almost entirely on a portfolio you don't have yet
- **Portuguese-taught.** Same language problem

Get the tuition confirmed in writing before getting excited — the annual figure is not published as a single number, and the fee page lists *two different* master's application fees (€460 and €180) without distinguishing them.

IADE / Universidade Europeia, Lisbon — *Mestrado em Comunicação Audiovisual e Multimédia*

Genuinely accredited (A3ES R/A-Cr 25/2019/AL03), transparent pricing (**€11,204.60** total, or €10,082.60 with the 10% reduction), and a **real, quantified merit scholarship: 40% off tuition for foreign-institution graduates with a 16.5/20 average** — a high bar, but concrete.

But it's the wrong subject. It teaches digital journalism, infographics, transmedia and web labs. Sound appears once. Don't pay €11,200 for it.

Everything else in Portugal is a short course, not a degree

ETIC (€1,700–€2,125), ProDJ Academy (€1,490–€2,490), Restart, Garnish Lisbon, EMMA — these are 100–200 hour certificates. Some are decent training and cheap enough to consider as *skill-building alongside something else*, but none is a master's, and none supports a visa. Lusófona's *pós-graduação* in Produção e Tecnologia do Som **appears discontinued** — and would not have been a degree anyway.

Spain — 36 options, and only a handful are real degrees

Spain has by far the most private provision, and by far the worst signal-to-noise. The *título propio* problem is pervasive: **most Spanish private "masters" in this field are not official degrees.**

The cheapest credible option — and why verification pushed it down the list

UCAM (Universidad Católica San Antonio de Murcia) — Máster de Formación Permanente en Producción Musical — *verified* · verdict **CONDITIONAL** · rating **C**

Everything good about it survived verification, confirmed to the cent:

- **€4,194.12 all-in** (€3,900 tuition + €235 pre-enrolment + €59.12 insurance) — about **one-fifteenth of Berklee's all-in cost**, and €65 per ECTS against La Salle's €199
- **Your degree is named by name.** Verified wording: the programme "*de forma especial se dirige a egresados en áreas de Comunicación Audiovisual, Periodismo, Musicología, Magisterio Musical, Ingenierías en Telecomunicaciones e Informática...*"
- No portfolio. No IELTS. Foreign degrees accepted **without homologation**. Sony Music España involvement, named Spanish electronic producers teaching, a Cubase licence and Steinberg certification included. September start. Only **12 places** — effectively first-come

- It is a *título propio* — a university certificate, not an official master

But the visa is the problem, and it's the format not the paperwork. It is *semipresencial* (hybrid). Against the 20-contact-hours / 12-in-person test above, a hybrid programme is at high risk of failing — and verification's judgement was blunt: "*if he were already living legally in Spain, this would be the clear recommendation.*" He isn't.

Do not pay anything until UCAM's international office confirms **in writing** that this specific programme, in its hybrid format, supports a *type-D estancia por estudios*. Also: taught entirely in Spanish, realistically needing B2 for a Spanish-language final project.

The strongest degree — and the weakest fit for your goal

La Salle Campus Barcelona (Universitat Ramon Llull) — MSc Acoustics, Audio and Vibrations

- A genuine **Máster Universitario Oficial**, certificate issued by the Ministry of Education, 60 ECTS, **taught fully in English**
- This is the one programme in Spanish private education where **your engineering degree is an advantage rather than something to explain away** — it accepts *only* STEM backgrounds; a music degree would not qualify. No portfolio, no musicianship proof
- Real published scholarships open to internationals: Academic Excellence 20–50% by GPA, Boost Scholarships 10–40%
- **Tuition is not published.** Must be requested from admissions — don't trust aggregator sites
- It is acoustics and audio *engineering*, not creative production. It will not, by itself, make you a producer

Berklee Valencia — real, prestigious, and extremely expensive

	MPTI (Music Production, Technology & Innovation)	SFTV (Scoring for Film/TV/Games)
Accreditation	US NECHE only — not a Spanish official degree	NECHE + Spanish , via affiliation with UPV
Tuition	USD 50,430	USD 50,430
Extra fees	+1,600 comprehensive, +800 software, +150 application, +2,500 deposit	+2,990 recording services, +1,600, +700, +150
Realistic all-in year 1	USD 67,000–71,000	USD 70,000–74,000
Fit for you	Good — DJing, electronic production, Ableton/Max	Poor — needs a strong composition background
Visa	Yes — most visa-reliable private option in Spain	Yes

Both are *verified*. **MPTI: verdict CONDITIONAL, rating A** — the highest rating awarded to any Spanish option. **SFTV: verdict AVOID, rating C** — right school, wrong programme for you.

MPTI accepts non-music bachelors "*provided the student demonstrates a high degree of musicianship*" — the burden shifts entirely onto your portfolio, though the "technological proficiency" criterion is where your software background genuinely helps.

Two corrections from verification: **an interview is required for all graduate programmes**, not just for selected applicants (an *audition* is required only for Contemporary Performance). And the USD 2,990 Professional Recording Services fee applies to **SFTV only** — MPTI is not charged it. Also budget for a paid third-party credential evaluation (SpanTran or ECE) of your SMU transcript, typically USD 150–250, which Berklee requires for all non-US/Canada degrees.

Deadlines (recurring annual pattern, so these are your 2027 dates): Early Action **1 Nov 2026** (scholarship 15 Nov) · Regular **15 Jan 2027** (scholarship 1 Feb) · Extended **10 Mar 2027**. Note the scholarship deadlines differ from the application deadlines.

Ruled out, so you don't waste time when you find them

- **UNIR** *Máster Universitario en Composición Musical con Nuevas Tecnologías* — a real ANECA degree, but **you are ineligible**: it requires a music degree, a conservatory diploma, or 2+ years as a conservatory teacher / orchestral musician. You meet none of the three routes. Also 100% online no visa
- **VIU** *Composición Musical* — same: music qualification required, 100% online, no visa
- **Universidad Europea** *Investigación Musical* — musicology research, Spanish, online. Its attractive *Máster en Producción Creativa de la Música* (Carlos Jean on faculty) **has no live page and appears to no longer run** — email before building any plan on it
- **Universidad Francisco de Vitoria** *Postgrado en Producción Musical* — *verified* · **AVOID** · rating **C**. €6,100–6,500 for a **30-ECTS, three-month evening certificate** — the most expensive Spanish option per credit (~€203–217/ECTS against UCAM's €65). Its timetable is Mon–Fri 18:00–20:00 = **10 contact hours a week**, which fails *both* limbs of the Spanish visa test. It also expects prior music or sound training you don't have. Legally unusable as a relocation plan
- **SAE Spain, TAI, Microfusa, CEV, CICE, ENTI, ECIB, UAX, Nebrija, UDIMA, DJP, Trazos, Point Blank Ibiza** — all *título propio* or plain private certificates

Italy — the best result in the entire sweep

First, the naming trap, because Italy's is the most confusing of the four: an Italian "**Master universitario di I livello**" is a 60-CFU post-bachelor certificate — **not** a second-cycle degree, despite the English-looking word. The real second-cycle qualification is the *laurea magistrale* at universities and the **Diploma Accademico di II livello** at AFAM institutions, which is legally equivalent to it. Both are EHEA-valid, PhD-eligible and visa-valid through University.

Italy is the only country in this sweep where a **private** institution offers an **official second-cycle degree in exactly your craft at a price a self-payer can survive**.

Saint Louis College of Music, Rome — the single best find

A MUR-authorised AFAM institution awarding **Diploma Accademico di II livello** — legally equivalent to a laurea magistrale. It runs **four** two-year degrees in your field:

- **Sound Design & Post Produzione Audio**
- **Music Production**
- **Live Electronics**
- **Mix & Mastering**

Tuition	€14,460 (Very Early Bird) – €17,000 (regular, 3 instalments) for the <i>whole two years</i> , at the international rate
Other fees	Enrolment €240/yr (€290 after 30 May) · deposit €250 (deducted from tuition) · regional study tax €140/yr · final diploma exam €500 one-off. Admission itself is free
First-year outlay	≈ €8,280–€8,330 before laptop and living
Two-year total	≈ €16,900–€17,900 in tuition and fees
Entry	<i>Diploma di Triennio universitario o accademico</i> + 15 years of schooling. Your BSc satisfies this (16 years)
Portfolio	For the <i>Composizione / Musica Elettronica / Musica Applicata</i> family: "a link containing the <i>Portfolio</i> (video, audio, scores) of your most representative and recent works." No fixed number
Audition	Portfolio-based pre-selection, then an admission test over two days. Attitudinal interview tests English or Italian
English test	No IELTS requirement published — language is checked in the interview
Facilities	Rome studios, Pro Tools certification pathway, in-house record labels that release the best student work to streaming , Dolby Atmos short course, Erasmus+ partner since 2012
Deadline	30 April — hard deadline for international applicants. Admission tests June and September; internationals can sit them online January–June
Applications open	3 February (international applicants: 1 January)

Compare: **≈€8.3k/year here against NABA's €22k**, for a degree that is actually about sound design, Wwise, Pro Tools and live electronics rather than adjacent to it. Your engineering background formally qualifies you and the Live Electronics / SuperCollider content plays directly to it.

Teaching uses **both Italian and English** — it is not an English-only programme, and Italian will be needed in practice. Foreign degrees need a *Dichiarazione di Valore* from the Italian consulate **or** a CIMEA statement — start that early, it is slow. The school itself warns visa procedures can be very long.

NABA Milan — the easiest admission in Italy, and the most expensive

Official MUR **Diploma Accademico di II livello**, 120 CFA. Two relevant MAs: *Digital and Live Performance* and *Creative Media Production*.

- **No audition. No music prerequisite. Any bachelor's degree.** And the English bar is extraordinarily low: **IELTS 5.0 Academic**, or B1 CEFR — far below the 6.5 most European masters demand. For someone who hasn't sat the test yet, that matters
- **Non-EU applicants get the maximum scholarship:** the International Postgraduate Scholarship competition awards **up to €6,000** of first-year tuition to non-EU residents, portfolio-assessed
- **€44,500 for the two years** at the non-EU rate. Even with the maximum award, ≈€16,250 in year one and ≈€38,500 across the degree
- It is performance/interaction design and creative media — **not** producing records or DJing. *Creative Media Production* is the programme that most values your software background (the year-two creative-

coding specialisation is practically built for you), but you would graduate a creative technologist, not a producer

Scholarship deadline for the Oct-2026 intake was **27 May 2026** — expect a similar late-May window for 2027, which is *earlier* than the standard application deadline.

RUFA Rome — legitimate and cheap, but Italian-only and not a sound course

MUR-recognised AFAM, official II livello. *Multimedia Design and Creative AI* runs **€16,000 (lowest band) – €29,600** over two years Italian-taught, plus **€1,800 enrolment per year** and a €100 non-EU application fee; a 10% early-bird discount is published. Roughly a third to a half of NABA's price. But there's no sound design or music production degree here, and this course is **available only in Italian** with mandatory in-person attendance.

Italy's traps

- **Scuola Mohole, Milan** — the syllabus is the closest match in Milan to what you want, but it advertises a "*Bachelor of Arts — Laurea Europea... riconosciuto in UE, UK e USA*" while **naming no awarding body or accrediting authority**. It is not in the AFAM system, so there is no normal University visa route. It is also *undergraduate* — you'd be starting over. If you ever contact them, ask one question in writing: **which body awards the degree?**
- **SAE Institute Milano** — its MUR authorisation (DM 280, 16/05/2017) covers only the *Diploma Accademico di Primo Livello* in Produzione Audio. The Electronic Music Production course (€5,900) is a private certificate with no recognition
- **IED Milan/Rome** — genuinely accredited, but **first level only** for Sound Design. Its second-level *Interactive Environments* in Rome is official but isn't a sound course
- **Università Cattolica ALMED** (€7,500) and **IULM** (€7,400) — both honestly labelled *Master universitario di I livello*: real, MUR-recognised, and **one rung below a magistrale**. 60 credits. Fine as a music-business add-on, not a substitute for a second-cycle degree
- **Accademia del Suono, Milan** — **closed**. Its homepage carries a farewell notice dated 10 July 2026. You will still find it in directories

The money, side by side

Sorted by what you'd actually pay for the whole qualification.

Option	Country	Real degree?	Total tuition	Right subject?	Language	Visa
UCAM Producción Musical		título propio	€3,900		Spanish	hybrid — high risk
Lusófona Produção e Tec. do Som		mestrado	€7,600–9,130		Portuguese	
IULM / Cattolica music business		I livello (60 CFU)	€7,400–7,500	partly	Italian	

Option	Country	Real degree?	Total tuition	Right subject?	Language	Visa
Saint Louis Rome — Sound Design		II livello	€14,460–17,000		It + En	
UCP Porto Som e Imagem		mestrado	€13,140		Portuguese	
IADE Com. Audiovisual		mestrado	€11,205 (€10,083 –10%)		Portuguese	
RUFA Multimedia & Creative AI		II livello	€16,000–29,600 +€3,600		Italian only	
La Salle Acoustics MSc		oficial	not published	engineering	English	
Abbey Road Amsterdam			€18,860–21,360		English	
SAE Amsterdam BA		(and a bachelor)	€25,630–37,580		English	
NABA Milan MA		II livello	€44,500 (– €6,000)		It + En	
Berklee Valencia MPTI		US degree only	≈ USD 50,430		English	

Living costs on top, roughly per month: Porto €800–1,100 · Lisbon €900–1,300 · Rome ~€900 · Murcia ~€700 · Barcelona ~€1,000 · Valencia ~€900 · Milan €1,100–1,400 · Amsterdam €1,150–1,500.

The shape of the answer: the two options that are simultaneously a *real degree*, in the *right subject*, at a *survivable price*, with a *working visa route* are **Saint Louis Rome** and **Lusófona Lisbon** — with **UCP Porto** close behind. Everything cheaper is not a degree; everything in the right subject that's more expensive is Berklee.

Deadlines — what this means with no IELTS yet

When	What
Now Nov 2026	Build the portfolio. Target Abbey Road's spec: 4–8 finished tracks, different roles, your role stated per track . This is the binding constraint on every application here, not the paperwork
Now mid 2027	Pick your language and start it. Italian for Saint Louis, Portuguese for UCP/Lusófona. This is the real gate, not English
Now	Start the Dichiarazione di Valore (Italian consulate) or a CIMEA statement for your SMU degree if Italy is in play — it is slow and it blocks the application, not just the visa
~Sept 2026	Sit IELTS. Needed for Berklee and La Salle. NABA accepts just 5.0 ; Saint Louis publishes no requirement at all

When	What
1 Nov 2026	Berklee Valencia Early Action (scholarship 15 Nov)
1 Jan 2027	Saint Louis Rome opens for international applicants — and you can sit the admission test online any time January–June
15 Jan 2027	Berklee Regular Action (scholarship 1 Feb)
3 Feb 2027	Saint Louis general applications open
~Late Jan/Feb 2027	UCP Porto Phase 1 opens
Feb–Apr 2027	UCP Porto Phase 1 window — interview mid-April, result late April
10 Mar 2027	Berklee Extended Action
Spring 2027	Lusófona early phase — do not wait for the July–Sept phase, it's incompatible with a D4 visa from Tunis
~Late May 2027	NABA scholarship competition closes (2026 date was 27 May) — earlier than its normal application deadline
** 30 April 2027**	Saint Louis hard deadline for international applicants. Late applications only at the Direzione's discretion

Two things worth noticing:

Your untaken IELTS is not the blocker you thought it was. The best options in this sweep are Italian- and Portuguese-taught. Where English *is* tested, NABA asks for **5.0** — a band you could clear without much preparation. The real language investment is Italian or Portuguese.

April 2027 is the true deadline, not September. Saint Louis closes 30 April and UCP Porto's usable phase ends 9 April. Working backwards, the portfolio has to exist by **early 2027**, which means starting it now.

What I'd actually do

1. **Write to Saint Louis Rome first** (saintlouis.eu/studenti-internazionali). Ask: how much of the Sound Design biennio is taught in English, what the portfolio pre-selection expects from a candidate with an engineering background, and whether CIMEA is accepted in place of the Dichiarazione di Valore. This is the best combination of *real degree* · *right subject* · *payable price* found anywhere in this sweep, so its answer shapes everything else.
2. **Write to UCP Porto** (candidaturas.porto@ucp.pt): is there an English-taught route, and what are the portfolio assessment criteria. It is the only Portuguese programme that names engineering in its own entry requirements.
3. **Write to UCAM** for written confirmation that the *semipresencial* format supports a type-D student visa. At €4,194 it's worth ten minutes to find out — but don't pay before the answer.
4. **Start the portfolio this month.** Every route here is decided on it: Lusófona weights interview + portfolio at **75%** of the selection score, Saint Louis pre-selects on it, NABA assesses its scholarship on it. Use Abbey Road's spec as the target.

5. **Pick a language and start.** Italian or Portuguese — both open doors that English does not.
 6. **Ask La Salle Barcelona for the tuition figure** and whether Software Engineering counts under their "or similar" clause. Worth knowing, but it's audio engineering, not production.
 7. **Treat the Netherlands as closed** and don't spend more time on it.
-

Status & honesty notes

- **All four countries complete:** Spain 45 · Netherlands 26 · Italy 22 · Portugal 21 = **114 unique institutions and programmes**, including the international chain-school and funding slices.
- **Verification:** 5 records have been fully re-checked against their official pages and carry a verdict and rating (marked *verified* above): Berklee MPTI (**A**), Berklee SFTV (AVOID), La Salle (B), UCAM (C), UFV (AVOID). The remaining 109 are discovery-quality — well-sourced, with the schools' own caveats attached, but not yet double-checked. The verification pass kept hitting session limits and is being resumed.
- **What verification changed:** it overturned my claim that an unofficial award blocks a Spanish student visa — it does not; study intensity does. That correction is in the box near the top, and it matters because it re-opens *título propio* options that I had written off, while ruling out evening and part-time courses at perfectly legitimate universities.
- Figures marked UNVERIFIED in the dataset are exactly that — the schools do not publish them. Nothing here is estimated where a school stayed silent; where I give a range, it is derived from published per-month or per-instalment figures and labelled as derived.
- Deadlines marked **PRIOR CYCLE** are the 2026/27 dates, shown because these schools repeat their calendars closely. Confirm each when the 2027/28 cycle opens.
- Full per-record detail, including fees, portfolio specs and source URLs, is in **results/private-schools-es-pt-nl-it.xlsx** — filter the *Accreditation* column first.
