

# Blocked sources and slices needing a redo

Kept as a live list so nothing quietly disappears. Everything here also lands in `gaps.md`.

## Domains that defeat every automated fetch available here

403 to WebFetch, curl (full browser headers), and headless Chromium alike. Chromium cannot reach the session proxy at all (`ERR_CONNECTION_RESET` on every host, including `example.com`), so a JS-capable fallback does **not** exist in this environment. The Wayback Machine is rate-limited (429) and is not a workaround.

| Domain                                                                                                                                                   | Why it matters                                                                                                                                                                                                  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <code>upf.edu</code>                                                                                                                                     | <b>The single most important institution in the sweep</b> — Music Technology Group, the SMC master. Official status recovered from RUCT (4315538, renewed); <code>fees/language/curriculum</code> pages unread. |
| <code>www.ub.edu / web.ub.edu</code>                                                                                                                     | UB's <b>official master catalogue could not be enumerated at all</b> . Only the Data Science microsite and IL3 ( <code>títols propis</code> ) were reachable. Needs a human or a JS-capable fetcher.            |
| <code>unir.net</code>                                                                                                                                    | Recoverable via curl with full browser headers in some cases; 403 to WebFetch.                                                                                                                                  |
| <code>il3.ub.edu</code> , <code>pointblankmusicschool.com</code> , <code>imep.es</code> , <code>upv.es</code> (rate-limits at 503), <code>ecam.es</code> | Partially or wholly unread.                                                                                                                                                                                     |
| <code>guiadocent.upf.edu</code> , <code>estudiospropios.unizar.es</code>                                                                                 | Refused by the <b>network gateway</b> (502 on <code>CONNECT</code> ), not by the site.                                                                                                                          |

## Título propio catalogues not enumerated

Andalusian `propios` are only enumerated for **UGR, US, UCO**. Unreachable (503/500/JS-only): **UMA, UCA, UJA, UHU, UAL, UPO**. Their own-certificate offerings are therefore missing — which matters most for fields P and S, where `propios` dominate.

## Catalogues served client-side only

UPO and UAL resolve their master lists in JS, so per-programme URLs are `NOT FOUND` and the Junta de Andalucía DUA register code is cited instead.

## Useful substitute registries found while working around the above

- **Junta de Andalucía DUA** — `sguit/?q=masteres&d=mo_catalogo.php`, 888 authorised entries across all 8 Andalusian public universities. A real cross-check where RUCT was not driven.
- **RUCT itself** — now scripted, see `.masters-search/spain/ruct.py`.

## Slices to redo or finish

- UB official masters (blocked).
- Point Blank Ibiza (403) — appears to top out at BA level, **not verified**.
- Catalan-language and título-propio sweeps for field A/B — dropped when a search budget ran out.

- Smaller telecom schools' internal DSP tracks (Cantabria, Zaragoza, EHU, Oviedo, USC, ULPGC, UPNA, Tecnun, UPCT): standalone titles ruled out via RUCT, internal tracks unchecked.
- RUCT's Ingeniería Informática result set was paginated and only partly screened for cloud especialidades by the field-AC agent — the backbone now covers the titles, but not which of them contain a cloud track.
