

gaps.md — what this dataset does not know

Generated from the data, not written by hand, so it cannot drift from what the dataset actually contains. Every entry is either a fact nobody could source, a place two sources disagree, or a question that needs a human with an email client.

The brief's framing, kept: an incomplete dataset that is honest about its gaps is a success; a complete-looking dataset containing one invented fee, deadline or eligibility ruling is a failure, because it will be acted on.

1. Coverage — what was searched versus what was enriched

- **970 unique candidate programmes** were discovered across 19 discovery slices.
- **135 were enriched** to the full schema.
- **790 remain deferred** in `deferred_candidates.jsonl` — parked, not dropped.

The deferred set is real coverage debt. Discovery was deliberately broad (false positives are cheap, misses are not), and enrichment at four pages per programme does not fit that breadth in the time available. Round 1 took the candidates where enrichment most changes the answer: an active official title, a core field, corroboration from two independent discovery axes, and a working URL. **Anything in the deferred file has been seen but not checked, and must not be treated as absent or as rejected.**

2. Verification status

status	count	meaning
VERIFIED	101	a second agent, given only the name and institution, reached the same answers
CONFLICT	33	the two passes disagree on at least one field; both values kept
UNCONFIRMED	0	the verifier could not source the fields at all
NOT VERIFIED	1	no independent pass ran — single-sourced, treat with more caution

15 programmes carry a conflict on a decisive field (cost, deadline, official status or language) and the brief escalates those to a third agent for a tie-break. That tie-break has not run. Until it does, treat these figures as contested:

- **Máster Universitario en Composición Musical para Cine, Televisión y Vi** — Berklee College of Music, Valencia Campus (Berklee V · disputed: currency, official_status, official_status / UPV-side listing, places_offered
- **Máster Universitario en Innovación en Tecnología Musical (Music Techno** — Universitat Politècnica de València (UPV) — teaching · disputed: application_window_2027, currency, official_status, programme_identity
- **Máster Universitario en Aprendizaje Profundo para el Tratamiento de Se** — Universidad Autónoma de Madrid (UAM) — Escuela Polit · disputed: tuition_total_eur
- **Máster Universitario en Ciencia de Datos** — Universidad Autónoma de Madrid (UAM) — Escuela Polit · disputed: tuition_total_eur

- **Máster Universitario en Sistemas Interactivos Inteligentes** — Universidad Autónoma de Madrid (UAM) — Escuela Polit · disputed: tuition_total_eur
- **Máster Universitario en Ciencia de Datos e Inteligencia de Negocios** — Universidad Complutense de Madrid (UCM) — Facultad d · disputed: tuition_per_ects_eur, tuition_total_eur
- **Máster Universitario en Nuevas Tecnologías Electrónicas y Fotónicas** — Universidad Complutense de Madrid (UCM) — Facultad d · disputed: tuition_total_eur
- **Máster de Formación Permanente en Big Data, Data Science e Inteligenci** — Universidad Complutense de Madrid (UCM) — Centro de · disputed: modality, tuition_total_eur
- **Máster Universitario en Análisis de Datos Deportivos** — Universidad Rey Juan Carlos (URJC) · disputed: tuition_total_eur
- **Máster de Formación Permanente en Ciencia e Ingeniería de Datos** — Universidad Rey Juan Carlos (URJC) · disputed: official_status
- **Máster Universitario en Economía con Ciencia de Datos** — Universidad de Alicante (UA) · disputed: non_eu_surcharge, tuition_per_ects_eur, tuition_total_eur
- **Máster Universitario en Inteligencia Artificial Aplicada a la Industri** — Universidad del País Vasco / Euskal Herriko Uniberts · disputed: programme name, tuition_total_eur
- **NEGATIVE FINDING — la Universitat Oberta de Catalunya no ofrece un más** — Universitat Oberta de Catalunya (UOC) · disputed: application_window_2027, official_status, tuition_year_of_rates
- **Máster en Producción Musical** — CEV — Escuela Superior de Comunicación, Imagen y Son · disputed: official_status
- **Máster Universitario en Electrónica y Tecnología Digital Aplicada (MET** — Universidad de Las Palmas de Gran Canaria (ULPGC) · disputed: language_of_instruction

3. Starred fields that are NOT FOUND

These are the fields the brief marks as deciding the outcome. A blank here means nobody could source it — never that the answer is zero or no.

field	missing	of
official_status	0	135
ruct_code	6	135
tuition_total_eur	31	135
tuition_year_of_rates	28	135
non_eu_surcharge	53	135
language_of_instruction	16	135
complementary_credits_required	0	135
credit_recognition_available	97	135
application_window_2027	29	135

4. Programmes whose September-2027 intake is in doubt

Scored down accordingly, but listed here because a registry entry is not a promise that a programme will admit you.

programme	institution	risk
Máster Universitario en Composición Musical para Cine, T	Berklee College of Music, Valencia C	title winding down (A EXTINGUIR)
Máster Universitario en Innovación en Tecnología Musical	Universitat Politècnica de València	title winding down (A EXTINGUIR)
Máster Universitario en Tecnologías del Sonido y de la M	Universitat Pompeu Fabra (UPF)	title winding down (A EXTINGUIR)

Máster Universitario en Inteligencia Artificial Aplicada	Universidad de Diseño, Innovación y	title winding down (A EXTINGUIR); not yet verified / not yet

5. Funding — what is closed, and what is still open

Tunisian eligibility	count
NO	43
CONDITIONAL	23
YES	10
NOT FOUND	5
CONDITIONAL —	2
NO FOR THE FIR	1

Every NO carries the disqualifying clause verbatim with its URL in `funding.csv`, so a closed route can be re-checked rather than re-researched.

Eligibility could not be established at all for these — they are open questions, not refusals:

- CoSI — Erasmus Mundus Master in Computational Colour and Spectral Imaging (COlou — European Commission / EACEA (Erasmus+ EM

- CSIC — Becas JAE Intro / JAE Intro ICU (introducción a la investigación) — Consejo Superior de Investigaciones Cien
- Ministerio de Ciencia, Innovación y Universidades — funding for máster universit — Ministerio de Ciencia, Innovación y Univ
- Generation Google Scholarship (EMEA) - UNVERIFIED — Google
- Company-funded master's places at Spanish universities (Indra, Repsol, Inditex, — Indra / Fundacion Repsol / Inditex / Fun

6. Questions that need a human

Each of these needs an email or a browser session. They are listed because they are decision-changing, not because they are merely unfinished.

Blocked by this environment, not by the source

- **www.upf.edu returns 403 to every fetch method available here** — WebFetch, curl with full browser headers, and headless Chromium alike. `mtg.upf.edu` redirects into the same wall. UPF hosts the Music Technology Group and the Sound and Music Computing master (RUCT 4315538). Official status came from the registry; **fees, language and curriculum were never read from the source**. `bsm.upf.edu` is a separate site and does work.
- **UB's official master catalogue could not be enumerated at all** (Cloudflare). Only the Data Science microsite and IL3 (títols propis) were reachable.
- **ucjc.edu returns HTTP 202 with a 221-byte shell** for HTML and PDFs alike, including its price book — it looks like a response and carries nothing.
- **www.uclm.es 403s**, and Castilla-La Mancha's decree defers the non-EU figure to UCLM's own tariff — so that community's real cost is the one hole in an otherwise complete map.
- **fundacionindra.org and fundacionaccenture.org fail at the network gateway (502)** — an environment block, NOT evidence that no scheme exists.
- Título propio catalogues for **UMA, UCA, UJA, UHU, UAL, UPO** returned 503/500/JS-only and are unenumerated. That matters most for fields P and S, where propios dominate.

Specific questions worth one email each

- **WAVES (Erasmus Mundus, UPV Gandia)** — the consortium announced it would not open recruitment for 2026-2028, while UPV still advertises the title with a live calendar. *Will there be a 2027-2029 cohort?* This decides whether a top-ranked option exists.
- **BDMA** — EC funding ended; the successor appears to be DEAI (ULB/UPC/TU Wien/Lyon 1/Padova), first cohort 2026-28. *Is UPC still a partner, and is the 2027 intake funded?*
- **ISEACV Valencia, Sonología Aplicada y Creación Sonora** — the highest content fit in the conservatory register (deep learning, Python, Max/MSP). Admission PDFs unretrievable. *What is the prueba de acceso, and does it admit a non-music graduate?* One email decides whether this is the best music-tech option in Spain or not an option at all.
- **Musikene, Mediación/Gestión/Difusión Musical** — published rules admit graduates of any discipline with no audition. *Confirm in writing that a Software Engineering degree qualifies*, since this is the one conservatory route that looks genuinely open.
- **Berklee GEMB** — published per-credit price x credits does not equal the published total; the gap is over €4,000. *Which figure is right?*

- **UPF SMC** — wave 1 saw 'up to 50 credits of complementary courses', which would extend a 60-ECTS master to two years and change its cost completely. *How many complementos would a 300-ECTS software engineering graduate actually be assigned?*
- **UDIT (RUCT 3500703)** — officially registered, but no programme page exists anywhere on udit.es. *Does it run at all?*
- **Becas MEC** bars anyone already holding 'un título de nivel igual o superior'. A 300-ECTS 5-year engineering title may sit at MECES 3, the same level as a master. *Would that bar the candidate even if the residency rule were met?* Recorded as a reasoned flag, not a ruling.
- **CSIC JAE Intro** publishes no eligibility page (404s); universidades.gob.es 503s.

7. Recorded contradictions (48)

Rule 8 says record contradictions rather than resolving them silently. Both values and both sources are kept in `programmes.csv`. The pattern worth knowing: **the commonest disagreement is one source quoting the resident price and the other the non-EU price for the same programme** — which is exactly the confusion this candidate must not inherit.
